## Education

**University of Central Florida** — August 2017 – May 2020
*BS Computer Science, GPA 3.6* — *Orlando, FL*

- Achievements: 2x Dean's list
- Coursework: Data Structures and Algorithms, Compilers, Discrete Mathematics and Computational Theory, Computer Architecture, Database Systems, Analysis of Computer Communication Networks

**Valencia Community College** — May 2015 – May 2017
*AA Computer Science, GPA 3.93* — *Orlando, FL*

- Achievements: 5x President's list, 1x Dean's list, Member of Phi Theta Kappa Honor Society

## Projects

### BattleStAR (Won - Best UX Project at Swamphacks 2020)

- Languages and Frameworks: C#, Unity, Vuforia Engine
- AR Game that uses a deck of cards as markers to generate battleships that you can use in 1v1 battles
- Redesigned the AR controls to improve the shooting system's sensitivity to the human hand
- Expanded the app's capacity to handle more AR targets at the same time

### AR Soccer Referee Training

- Languages and Frameworks: C#, Unity, AR Foundation, Firebase, DynamoDB
- Trains soccer referees by simulating real-life soccer scenarios and allowing them to make decisions that affect the game
- Set up the DynamoDB database before switching to Firebase
- Wrote C# scripts to control the players' movements

### Project Stone (Discord Bot)

- Languages and Frameworks: Python
- Uses the CoinGecko API to returning the prices of crypto-currencies and the current exchange rates for currencies
- Parsed through a website using BeautifulSoup library to find if Publix Subs are on sale.
- Utilizes an API to return queries about the numbers of Covid-19 cases worldwide.
- Applies the MyAnimeList API to return anime and manga queries

## Experience

**CentralSquare Technologies** — Lake Mary, FL

*Service Desk Intern (Jan 2019 – Sep 2020)*
Network Support Specialist I (Sep 2020 – Present)

- Provides technical support for internal customers through tickets, phones, or in person
- Pre-image machines for equipment replacement and new hires
- Aide IT personnel such as equipment inventory
- Maintain Service desk documentation and knowledge base for internal customers

## Skills

**Programming Languages** C, Java, C#, R, Python, Haskell, F#
**Languages** Arabic, French, English
**Frameworks** Unity, Vuforia Engine
**Tools** MS Office, Eclipse, Visual Studio, GitHub, Git, PowerShell, Bash, gdb
