Skills

Programming Languages C, Java, C#, R, Python, Haskell, F#
Languages Arabic, French, English
Frameworks Unity
Tools MS Office, VS, VS Code, Eclipse, GitHub, Git, PowerShell
OS Windows, Mac OS, Linux

Projects

AR Soccer Referee Training (Senior Design Project)

- Android AR application that trains soccer referees
- Simulates real-life soccer scenarios and allowing referees to make decisions that affect the game
- Using Unity as our framework and relying on its AR Foundation package
- Will make our app available for IOS if time permits

Project Stone

- Discord bot written in Python for the purpose of learning Python and learning how to work with APIs
- Does basic functions like rolling a dice, flipping a coin, and answering eight-ball questions, etc.
- Uses CoinGecko API to find the latest prices for cryptocurrency
- Uses BeautifulSoup4 and Urllib to parse through arepulbixchickentendersubsonsale.com to find if Publix Subs are on sale. Planned expansion: search for arbitrary sale items directly from the Publix websiteok

Experience

CentralSquare Technologies — Jan 2019 – Present
Service Desk Intern — *Lake Mary, FL*

- Provide phone and walk-up support to tens of internal customers daily
- Image tens of machines weekly for new hires and for equipment replacement
- Close an average of 60 service tickets per month (Salesforce based service desk website)
- Train and assist 3 other interns with issues that they are unfamiliar with
